

400A SPECIAL EDITION

When we developed the 400A Special Edition, we wanted to create something truly special. There are several features about this new release that help make it unique. For starters, this marks the first time that Track has released a ball in the 400 series. We improved upon the performance and looks by using the highest grade resin available in our new Luxury MA cover. Finally, the eye catching White Diamond color scheme puts the 400A Special Edition in a class off its own.
